Using the old "classic" interface (top left) with the Elements version of Photoshop. (Image Credit: adobe.com) One of the least appealing aspects of Photoshop is the large folder of files it creates, taking up so much free space. Now, Photoshop Elements introduces new features that dramatically improve the look of photos that are saved to the computer. The New Photoshop Elements 10 Interface. (Image Credit: adobe.com) The interface is completely new. Photos can be organized into collections and libraries, which are folders in the same way that a computer user would keep files. To view and edit images, a user just need to open a photo or group of photos from the folders, similar to opening a folder on a computer. What's different about Elements is that the user can use layers. These are effects that work like different stages in layers of paint. There are two types of layers: adjustment layers and mask layers. Adjustment layers help with the size, brightness, color, details, contrast and more. They also help you retouch your photos. A mask layer is used for removing unwanted objects from images. This is good for pictures of animals or flowers. The picture shown below was taken by a dog in the forest. The owner took the picture so that she could share it with the world. Using the tool on a photo allows the user to clean up the background and make changes such as cutting out flowers or removing wildlife. To edit a photo using a mask layer, here's what you need to do: Right-click on the photo and choose Convert to Smart Object. After you've converted the photo into a smart object, follow the prompts to change the layer from a selection mask to a mask layer. In Photoshop, the editing tools are on the top toolbar (red box, above). To edit the mask, you click on the button on the top left of the main window (3 dots). After clicking on the big dots, you can open up the edit palette (shown above). The palette allows you to change the brightness, contrast,

saturation, sharpening, clarity, resize and more. On the bottom of the edit palette (shown above) is the option for adding a mask layer. After you add a mask layer (above), you can place the layer anywhere on the photo. With the photo as a "smart object," you can create a 388ed7b0c7

Before WWE drafted her to the main roster, the opportunity to become the RAW Women's Champion presented itself to her for the first time. As the SmackDown Tag Team Champions squaring off against The Rock and John Cena, she and Alicia Fox were in line for a title shot, which would have occurred after Team Cena dropped the Tag Titles to The Wyatt Family. The Miz would later attack Cena, disqualifying the Team Cenation leader and revealing himself as the leader of The Wyatt Family, after their attack on the Raw Women's Champion. She explained that the future is still somewhat unknown, but she's excited for what lies ahead. "Well, I've always dreamt of being part of the world of WWE and not just for a little bit, but for my entire life," Bayley said. "So, there's never been a moment I haven't wanted to be a part of WWE. I've wanted to be in WWE since I was a little kid. "So, I think this is going to be a really fun time. I'm excited. I'm really excited to see where this road leads me in the world of WWE. I'm excited to see what the future holds for me." It's clear that Bayley is a girl who likes to be challenged, which is why she chose to team with Charlotte for the SmackDown Tag Team Titles against Becky Lynch and Dana Brooke on the October 14 edition of SmackDown. Even though she's somewhat new to the game, she has earned the right to challenge for the title. The only thing the former Smack
